Creative and detail-oriented full-stack Software Developer with a passion for writing clean, maintainable code. Committed to continuous growth through learning and applying new skills in real-world scenarios. Supportive team player with a collaborative spirit, committed to helping Agile teams build reliable, high-quality software.

Skills

Agile Software Development | MERN Stack | Communication | Collaboration | Problem Solving | Git

Education

Software Development Bootcamp — Circuit Stream, Online   **Completed July 2025**

Intensive, career-focused program in full-stack software development. Gaining hands-on experience building scalable web and mobile applications, leveraging modern AI tools to optimize coding efficiency, and developing a strong understanding of software engineering roles across the full product development lifecycle.

Virtual Assistant Certificate Program — Okanagan College, Online   **Completed June 2024**

This 36-week program focused on remote work skills in digital communication, time management, and productivity tools. I built strong habits in project and task organization, client collaboration, and independent problem-solving—all of which directly support agile workflows and remote software development environments.

Professional Experience

Software Development Intern — makeitMVP, Miami Beach, Florida (Remote)   **January 2025 - Present**

- Helped build a skills snapshot feature for an existing platform, which won the competition for best feature during the first iteration of the Launch Academy Phase 6 project.
- Translate the designer's Figma files into working features, adapting to design changes throughout the process, and ensuring alignment with the product vision and requirements.
- Maintaining enthusiasm for collaborating with teams of developers and designers to apply what I know and learn what I don't know.
- Navigating complexity to deliver solutions on 100% of challenges accepted.
- Contributions include proofreading and editing, presenting product updates, documenting team meetings, ideas, and feedback, and promoting daily standups and communication.

Software Development Intern — New Idea Machine, Calgary, Alberta (Remote)   **March 2025 - Present**

- Building podcast management app features while collaborating with the team, delivering successful code contributions via merged pull requests.

Awards

Circuit Stream — Certificate of Completion   **July 2025**

makeitMVP — Launch Academy Phase 6 Certificate of Completion   **March 2025**

Okanagan College — Certificate in Virtual Assistance (With Distinction)   **June 2024**
